

# ausephon

A 'broad' Australian English phonemic keyboard.

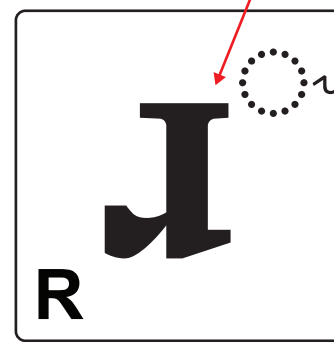

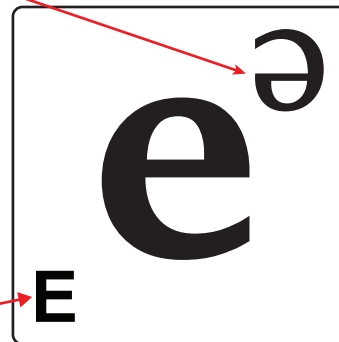

Type these symbols by pressing the SHIFT key on your keyboard as if typing an uppercase letter.

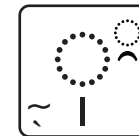

White letter keys contain an Australian or IPA symbol which is NOT similar to the key on your physical keyboard.

**KEY**

Bold bottom left letters match those on your physical keyboard. Now you know where to Blu Tack each letter on this sheet which you cut out!

Grey letter keys contain an Australian or IPA symbol which IS similar to the key on your physical keyboard. You might choose NOT to cut these out and Blu Tack them to your physical keyboard.

To type diacritics you will first need to type the letter to which you want to add a diacritic. For example, to type the consonant marker below /l/, /m/, /n/ or /ɹ/, type one of these aforementioned letters and THEN the BACKTICK key (to the left of the number 1 key).
